Best Practices:

Title:- Financial Aid to needy and scholarship supportss

Objective: - It has been observed that the students joining courses to the Institute that there are many students coming from the rural and tribal area with low economic background. Their parents are unable to provide them a continual financial support because they depend on agriculture is being a gamble with rain, is not an assured source of income. So, the noble objectives of the practice are

- To provide the Financial Aid and scholarships facility to support the needy and poor students especially from the rural and tribal area.
- To reduce the drop-out rate of the students in the college due to poor financial condition.
- To promote the 'equality' among the students

- To create a good citizen by educating the financially poor students.
- To create students who become financially independent after completion of their post graduation.

Context:-The Institute is situated in Tribal area. The maximum number of students belongs to basically low economic background of society. It is in this context that scholarships can help these students to complete their higher education. After comprehensive deliberations with students and teachers, it was decided to extend the benefit to all the poor students, who do not have the advantage of government or endowment scholarships, without any discrimination of caste, gender.

Practice:-

In the context of the professional education it required high amounts of money. Though, sometimes, they admit their children to colleges in the town, they are unable to give sustained financial support throughout the course of study because agriculture, being a gamble with rain, is not a source of assured income. So, it is evident that without financial support from an external source, the rural youth cannot hope to successfully complete their higher studies.

The college provides information about the different kinds of scholarships for the students through notice board and notice in class room. The students are made aware of different kinds of scholarships given to them by the state government,

The Institute provides various facilities for online submission of the scholarship form like providing the Scanner, Computer, Printer made available to the students by the college if any query occur during online form submission our clerks help them.

Evidence of Success: -To refer to one of the many success stories of the noble practice, the college has paid college fee of Mr. Raj student of M.B.A during 2015-17 Batch, Innovation and Best Practices ATESTC was paid from the ATESTC amounting to Rs. 75000/-per year for two years. He completed M.B.A successfully with more than 60% of marks. Now he is an accomplished Account Officer with better communication skills and a sense of social service.

The story is just an example the following is the list of such students, who emerged as beneficiaries of the scheme.

Due to the scholarship scheme all students are able to complete their education only because scholarship they got, otherwise they may be dropped-out from the course most of the students are now working in reputed organizations in various fields like IT, Networking, Software developer, Data Analyst, Marketing, Finance, Human Resource etc.

Problems Encountered and Resources Required: - Students and staff members were finding it difficult to communicate with each other initially staff is not much helpful after convincing them they are ready to work

Title: - Educational Management System through Software

Objectives of the Practice: - The institute implemented partial paperless office through ERP software system (https://atestc.vriddhionline.com/). With the help of this system, all the academic processes of institute are automated. The major objectives was to implement Paperless governance for day to day working through ERP

The Context: - Every faculty and staff is allotted an individual login ID to vriddhionlines software. The processes like Admission, Examination, maintaining Students and Faculty profile and Accountant are operational and followed by every faculty and the staff members of institute.

Academic Purpose: - All the material regarding academics is uploaded on the ERP Faculty member upload the following things on the ERP Teaching Workload, Academic Calendar, Result Analysis, Time table, for every semester. Course material is provided on ERP which mainly consists of Course syllabus, Monthly Continuous Assessment, Notes, PPT's, University question papers & Question banks

Faculty Profile Management: - All the staff members update their personal profile on the ERP i.e. Family Details, Medical Details, Qualification, Skill Up- gradation, Subject Taught, Training/ Conference/Seminar/Workshop attended, Publications/ Research Projects, Membership, Patents/Copyrights, Work Experience, Research Interest, Industrial Experience, Appointment Status, Service Book, Self-Contribution/ Additional Responsibilities etc.

Student Profile: - Every year batches are created based on intake capacity. Accordingly, divisions are created after the admission process. Students are given user-id & password which is used later for accessing the course material, teaching notes, PPT's, question bank etc.

Accountant: - all account related task is done through the software like credit, debit and it will produce the results like month wise income and expenditure.

Examination: -CEO Conduct Examination He/She has following rights to conduct the examination He/She can create Hall ticket, Timetable of exam, Block arrangement, Examiner and junior supervisor appointment, Paper rechecking, question paper, Remuneration for faculty and Staff.

Evidence of Success: - The lesson plan of the respective subject is available based on which the lectures are planned. Accordingly, the attendance has been monitored. The reports of placement activity are generated as per the requirements of company from students Profile.

Problems Encountered and Resources Required: -. Installation of the system with necessary application and data integration is difficult on various configurations of PCs. Conversion of previous manual system in to equivalent software system is not only difficult but also exhibits strongly oppose from various cadres of employees. Therefore, extensive training is necessary for employees with strong convincing ability. The institutional resources required for training of employees. High internet bandwidth and PCs with latest configuration required.
